

Harmonising Travel with the Environment

“To combat carbon emissions forest restoration is overwhelmingly more powerful than all the other climate change solutions.”

Dr. Thomas Ward Crowther British Scientist 2019

 CO₂ TRIP CALCULATORS - DEFRA - GHG - IPCC
 Verified Worldwide TREE PLANTING PROJECTS

With Every
TRIP

- The client receives detailed data reports projecting the carbon emissions of each business trip booked.

Track Your
CO₂

- Trees4Travel calculates the number of trees necessary to absorb the CO₂ produced within a ten year period.

Plant
TREES

- The appropriate fee is transferred from the client to Trees4Travel so that planting can begin.

Monthly
REPORT

- Monthly CO₂ reports continue to detail carbon output versus absorption and projected time period until CO₂ offset.

The Trillion Tree Community

Trees4Travel has joined the World Economic Forum community-driven initiative led by the United Nations Environment Program (UNEP) to ensure the conservation & restoration of one trillion trees within this decade.
